NOUR KAMAL AHMED

Full-Stack Software Engineer

Alexandria, Egypt ▪ +201203917464 ▪ noursalem741@gmail.com ▪ LinkedIn ▪ GitHub

PROFESSIONAL SUMMARY

Software Engineer specializing in full-stack web applications with end-to-end delivery across React, Next.js, and Node.js ecosystems. Experienced in developing real-time platforms, operational administrative dashboards, and distributed message-driven systems. Focused on clean system design, automated testing, and maintainable application structures.

EXPERIENCE

Software Engineer Intern | *I-Fikra* *Aug 2026 – Present*

- Contribute to enterprise web platforms across mobility dispatch and healthcare management domains under client confidentiality (NDA).
- Build and update internal administrative dashboard views and user workflows using Next.js and React.
- Integrate frontend modules with distributed backend microservices communicating via gRPC and RESTful endpoints.
- Write unit and integration tests using Jest to ensure API and component reliability across sprint releases.

Full-Stack Engineer (Freelance) | *Upwork (Remote)* *Nov 2025 – Present*

- Delivered an algorithmic trading strategy marketplace with a modular React frontend and Python backend services.
- Engineered custom React hooks to manage real-time strategy state, live market data feeds, and execution workflows.
- Built responsive dashboards allowing users to explore, backtest, and subscribe to trading models.
- Maintained a 100% Job Success Score across international client engagements through clear communication and clean delivery.

Web Developer & Committee Member | *IEEE Student Branch* *Jan 2024 – Jan 2026*

- Engineered core features for the official branch website, supporting 500+ active members.
- Developed backend services using Node.js and Express to manage event ticketing and user data handling.
- Optimized database queries and indexing schemes in MongoDB, improving page load speeds by 40%.

KEY PROJECTS

QuantHaven – Trading Strategy Platform

- Architected a full-stack SaaS platform enabling traders to explore, backtest, and monetize algorithmic strategies.
- Designed real-time performance analytics charts tracking Sharpe ratios, max drawdown, and win rates with sub-100ms UI re-renders.
- Structured modular state hooks and strategy-builder interfaces, reducing frontend code complexity by 30%.

VirtualQueue – Enterprise Queue & Staff Management Platform

- Built a virtual ticketing system with administrative and staff portals to manage customer queue flow in real time.
- Implemented RabbitMQ message brokers to decouple ticket generation from dispatching, preventing server bottlenecks during traffic spikes.
- Utilized Redis for ticket status caching and session storage, maintaining sub-15ms queue lookups.
- Built an interactive operations dashboard providing staff with live waiting room stats and ticket reassignment controls.

OwnShopy – E-Commerce Web Platform

- Architected an e-commerce platform with custom role-based CMS controls for inventory, orders, and fulfillment workflows.

- Integrated localized payment gateways (Fawry) and international processors (Stripe, PayPal) with unified webhook handling.
- Automated CI/CD pipelines targeting Microsoft Azure, achieving reliable uptime and secure production deployments.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, Tailwind CSS, Redux Toolkit, Context API

Backend: Node.js, Express.js, NestJS, RESTful APIs, gRPC, RabbitMQ, Microservices

Databases & ORM: PostgreSQL, Prisma, MongoDB, Mongoose, Redis

Testing & Tools: Jest, Git, GitHub, Docker, Postman, Microsoft Azure, Vercel

Languages: JavaScript (ES6+), TypeScript, Python, C++, Java, SQL

Soft Skills: Critical Thinking, Problem Solving, Agile Collaboration, Cross-Functional Teamwork, Adaptability

EDUCATION

B.Sc. Computer Science (Data Science Major) | *Alexandria University* *2027*

STEM High School Diploma | *Alexandria STEM School* *2023*

LANGUAGES

Arabic: Native | **English:** Professional Working / Fluent (B2)
